

behavior-anchors

Behavior Anchor Manifest — Challenges

Every row is a user-facing capability and the single anchor test that proves it works end-to-end. See CONST-035 in CONSTITUTION.md.

Status legend

- active — anchor exists and is callable; capability is verified.
- pending-anchor — capability declared, anchor test does not yet exist. Listed in challenges/baselines/bluff-baseline.txt Section 3. Reducing this state is the work of campaign sub-project 4.
- retired — capability removed; row kept for history.

Path format

For Go tests: <path>.go::

Capabilities

id	layer	capability	anchor_test_path
CAP-001	submodule:Challenges	Run a registered challenge end-to-end via DefaultRunner	pkg/runner/runner_test.go::TestDefaultRunner
CAP-002		Register a challenge	pkg/registry/registry_test.go::TestDefaultRegistry_Register_Su

id	layer	capability	anchor_test_path
	submodule:Challenges	in DefaultRegistry without collisions	
CAP-003	submodule:Challenges	Evaluate built-in not_empty assertion	pkg/assertion/builtin_test.go::TestEvaluateNotEmpty
CAP-004	submodule:Challenges	Generate Markdown report from challenge results	pkg/report/markdown_test.go::TestMarkdownReporter_GenerateReport
CAP-005	submodule:Challenges	Load challenge bank from JSON or YAML file	pkg/bank/bank_test.go::TestBank_LoadFile
CAP-006	submodule:Challenges	Construct ShellChallenge that wraps a bash script	pkg/challenge/shell_test.go::TestShellChallenge_NewShellChallenge
CAP-007	submodule:Challenges	Liveness monitor handles nil progress reporter without panicking	pkg/runner/liveness_test.go::TestLivenessMonitor_NilProgressReporter
CAP-008	submodule:Challenges	Construct API HTTP client with default config	pkg/httpclient/client_test.go::TestNewAPIClient
CAP-009	submodule:Challenges	Validate challenge result requires positive	pkg/challenge/antibluff_test.go::TestValidate_Pass

id	layer	capability	anchor_test_path
CAP-010	submodule:Challenges	evidence (anti-bluff metatest) userflow-runner CLI resolves "all" platform target to every registered platform key	cmd/userflow-runner/main_test.go::TestResolveGroups_AllPlatformEx
CAP-011	submodule:Challenges	Run challenges in parallel via DefaultRunner	pkg/runner/parallel_test.go::TestRunParallel_Su
CAP-012	submodule:Challenges	Execute challenge pipeline with stages	pkg/runner/pipeline_test.go::TestPipeline_Execu
CAP-013	submodule:Challenges	Anti-bluff runner downgrades a bluff PASS to FAIL in strict mode	pkg/runner/anti-bluff_runner_test.go::TestAntiBluff_BluffPassDo
CAP-014	submodule:Challenges	Resolve dependency-free challenge ordering	pkg/registry/dependency_test.go::TestGetDependencyOrder_NoDep
CAP-015	submodule:Challenges	Register a challenge plugin	pkg/plugin/plugin_test.go::TestRegistry_Registe

id	layer	capability	anchor_test_path
CAP-016	submodule:Challenges	Update monitor dashboard data from a lifecycle event	pkg/monitor/dashboard_test.go::TestDashboardData_UpdateFrom
CAP-017	submodule:Challenges	InfraProvider interface contract is satisfied by adapters	pkg/infra/provider_test.go::TestInfraProvider_In
CAP-018	submodule:Challenges	ADB CLI adapter constructor accepts ADB binary path	pkg/userflow/adb_cli_adapter_test.go::TestADBCLIAdapter_Constructor
CAP-019	submodule:Challenges	ProgressReporter constructor exposes a buffered channel	pkg/challenge/progress_test.go::TestProgressRe
CAP-020	submodule:Challenges	Environment-variable redaction masks API-key values in log output	pkg/env/redact_test.go::TestRedactAPIKey
CAP-021	submodule:Challenges	JSON logger constructor binds to stdout	pkg/logging/json_logger_test.go::TestJSONLogger_NewJSONLogger
CAP-022	submodule:Challenges	Prometheus metrics record challenge	pkg/metrics/metrics_test.go::TestPrometheusMetrics_RecordEx

id	layer	capability	anchor_test_path
CAP-023	submodule:Challenges	execution timing	pkg/userflow/challenge_browser_test.go::TestNewBrowserFlowC
		Browser flow challenge constructor binds adapter and steps	
CAP-024	submodule:Challenges	Mobile launch challenge constructor accepts mobile adapter and package	pkg/userflow/challenge_mobile_test.go::TestNewMobileLaunchCh

(Manifest now covers core runner+registry+plugin+monitor+infra+userflow capabilities — 24 active rows. Long-tail: per-protocol httpclient, adapter-by-adapter userflow tests, recorder integrity checks.)
