

Challenges â€” Constitution

INHERITED FROM the Helix Constitution

This module is governed by the Helix Constitution. All rules in the constitutionâ€™s `CONSTITUTION.md` and the `Constitution.md` it references apply unconditionally. Locate the constitution from any nested depth via its `find_constitution.sh` helper â€” do NOT hardcode a path (this module stays fully decoupled and project-agnostic per Â§11.4.28).

Canonical reference: <https://github.com/HelixDevelopment/HelixConstitution>

Status: Active. This document carries only the rules specific to this module. When a rule here conflicts with `CLAUDE.md`, `AGENTS.md`, or any guide, the Constitution wins; when it conflicts with the inherited Helix Constitution, the inherited Constitution wins.

Mission

See `README.md`.

Mandatory Standards

1. **Reproducibility:** every change is reproducible from a clean clone (`git clone <repo> && <project bootstrap>`); no hidden steps.
2. **Tests track behavior, not code:** test what the user-visible behavior is, not what the implementation looks like.
3. **No silent skips, no silent mocks above unit tests.**
4. **Conventional Commits** for all commits.
5. **SSH-only for git operations** (`git@â€¦`); HTTPS prohibited.

Definition of Done

A change is done when:

1. The code change is committed.
2. All project-level tests pass on a clean clone.
3. All challenges in `challenges/scripts/` pass on the running host.
4. Governance docs (`CONSTITUTION.md`, `AGENTS.md`, `CLAUDE.md`) are coherent with the change.
